¹The 30-Day SEC Yield is computed under an SEC standardized formula based on net income earned over the past 30 days.

It is a "subsidized" yield, which means it includes contractual expense reimbursements, and it would be lower without those reimbursements.

²The Unsubsidized 30-Day SEC Yield is computed under an SEC standardized formula based on net income earned over the past 30 days. It excludes contractual expense reimbursements, resulting in a lower yield.

³Yield refers to the earnings generated and realized on an investment over a particular period of time, and is expressed in terms of percentage based on the invested amount or on the current market value or on the face value of the security. It includes the interest earned or dividends received from holding a particular security. Depending on the nature and valuation (fixed/fluctuating) of the security, yields may be classified as known or anticipated. Equity Yield refers to the yield of the equity portion of the fund. Convertible Bond Yield refers to the yield of the convertible bonds in the portfolio and Preferred Stock Yield refers to the yield of the preferred stocks in the portfolio.

⁴The yield to worst (YTW) is the lowest potential yield that can be received on a bond without the issuer actually defaulting. The YTW is calculated by making worst-case scenario assumptions on the issue by calculating the return that would be received if the issuer uses provisions, including prepayments, calls or sinking funds. This metric is used to evaluate the worst-case scenario for yield to help investors manage risks and ensure that specific income requirements will still be met even in the worst scenarios.

⁵Calculated on the Fund's bond portfolio, including cash.

⁶Chartwell Investment Partners, LLC has contractually agreed to waive its fees and/or pay operating expenses for at least one year from the 3/1/19 prospectus.

Recent Fund Repositioning Rationale

More Diversification

- Broader opportunity set beyond fixed-rate corporate debt
- Additions since February 28 include Treasuries, Agencies, Mortgage-Backed Securities (MBS) and Commercial MBS (CMBS)
- The team has also added investment grade floating rate debt (10% of the total portfolio)
- The team will look to add Treasury Inflation Protected Securities (TIPS) at an opportune time

Longer Duration

- Increases the yield potential
- Partial hedge against equity exposure
- Duration has increased by 1 year since Feb. 28 to 4.26. We view 4.25–4.5 as neutral.
- The higher duration is a product of moving out of cash-like instruments and not an active bet on lower rates

Higher Average Quality

- Wider quality spectrum (AAA to B)
- More opportunity to find value
- Can act as a partial hedge versus equity exposure
- Since Feb. 28 the average credit quality of the portfolio has moved from Baa2 to A3

Higher Equity Allocation

- Higher risk/reward potential
- This is partially hedged by the changes in the fixed income portfolio
- Since Feb. 28 the equity allocation has increased from 16% to 27%

Benchmark

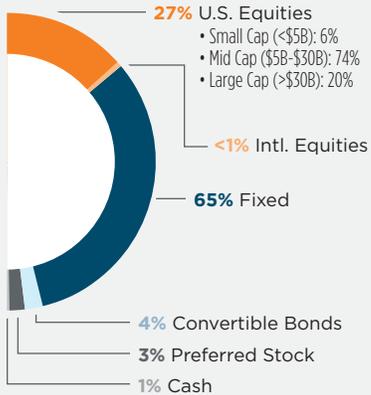

The Bloomberg Barclays US Aggregate Bond Index is a broad-based flagship benchmark that measures the investment grade, US dollar-denominated, fixed-rate taxable bond market. The index includes Treasuries, government-related and corporate securities, MBS (agency fixed-rate and hybrid ARM pass-throughs), ABS (asset-backed securities), and CMBS (agency and non-agency).

The FTSE US Broad Investment-Grade (USBIG) Corporate Bond Index tracks the performance of US Dollar-denominated bonds issued in the US investment-grade bond market.

One cannot invest directly in an index.

Asset Allocation

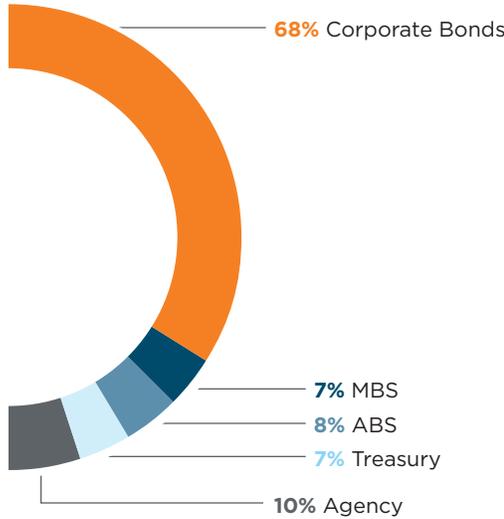

As of 05/31/2019

Effective March 1, 2019, the Fund's primary benchmark was changed from the FTSE Broad Investment Grade Bond Index to the Bloomberg Barclays U.S. Aggregate Bond Index, which more closely aligns with the Fund's investments.

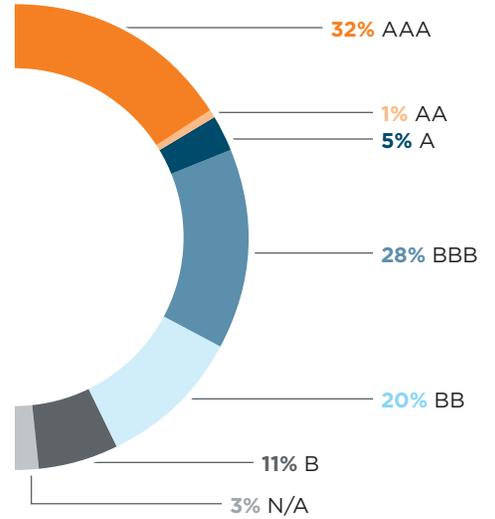

Fixed Income Sector

As of 05/31/2019

Fixed Income Credit Quality

As of 05/31/2019

Credit Quality: Credit quality ratings are sourced from Standard & Poor's (the "S&P"), Moody's and Fitch's. Ratings values are based on the higher of either S&P or Moody's. If none of the rating agencies has assigned a rating, the Fund will assign a rating of NR (non-rated security). The ratings represent their (S&P, Moody's) opinions as to the quality of the securities they rate. The ratings range from AAA (S&P) or Aaa (Moody's) (extremely strong capacity to meet its financial commitment) to D (S&P, Fitch's) or C (Moody's) (in default). Credit ratings of BBB are good credit quality and the lowest category of investment grade. Ratings are relative and subjective and are not absolute standards of quality. The ratings provided relate to the underlying securities within the fund and not the fund itself.

Investing in any mutual fund involves risk, including the risk that you may lose all or part of the money you invest. The Fund invests in both fixed income and equity securities. Its investments in fixed income securities are subject to such risks as: interest rate risk; call risk; default risk; high yield (junk bond) risk; and unrated bond risk. The Fund also invests in equity securities that carry the potential for unpredictable drops in value and periods of lackluster performance.
